

Service Specification No.	CPS005
Title	Supply of medication for the urgent treatment of COVID-19 by community pharmacy providers within NHS Surrey Heartlands ICB
Nature of Service	Provision of antiviral medication through NHS community pharmacy providers within Surrey Heartlands ICB
Commissioning Lead	NHS Surrey Heartlands ICB
Contact details for commissioning lead	Rachel Mackay
Provider lead	Named Pharmacy
Start date – specification valid from	1st Feb 2024
End date – specification valid until	1st April 2025
Specification interim review date	Annual

1. Population Needs

1.1 National/local context and evidence base

1.1.1 Introduction

This locally commissioned service (LCS) specification outlines the specialised service to be provided by a limited number of community pharmacies in Surrey Heartlands. The specification of this service is designed to cover the supply of medication following prescription of the treatment to a Surrey Heartlands patient by a clinician within the COVID medicines delivery unit. There is a requirement to start treatment quickly in line with the recommendations included in [NICE TA878](#).

1.1.2 Background

Integrated Care Systems have been delivering drug treatments for COVID-19 for high risk non-hospitalised patients since 16th December 2021 through a Covid Medicines Delivery Unit (CMDU). The service has been provided in line with the national pandemic [Clinical Commissioning Policy: treatments for non-hospitalised patients with COVID-19](#). Following the release of [NICE TA878](#) NHS England have requested that systems work with system partners to transition the service to a more business-as usual model in line with the recommendations made by NICE.

The aim of this service is to supply medications for the treatment of COVID-19, safely and effectively, under a local enhanced service (LES) from a small number of community pharmacies across the geography of Surrey Heartlands.

2. Outcomes

2.1 NHS Outcomes Framework Domains & Indicators

Domain 1	Preventing people from dying prematurely	
Domain 2	Enhancing quality of life for people with long-term conditions	
Domain 3	Helping people to recover from episodes of ill-health or following injury	✓
Domain 4	Ensuring people have a positive experience of care	✓
Domain 5	Treating and caring for people in safe environment and protecting them from avoidable harm	✓

2.2 Local defined outcomes

- To improve the access to these medicines when they are required by ensuring timely supply.
- To support patients and carers by providing up-to-date advice and guidance on self-care.
- To gather intelligence about any issues related to access because of local routine supply processes.

3. Scope

3.1 Aims and objectives of service

3.1.1 Aim:

To reduce the risk of complications from and spread of COVID-19, and to optimise treatment use by providing safe

access to treatment in a timely manner to avoid clinically unacceptable delays.

3.1.2 Objectives:

- To ensure that people with COVID-19 and who have been prescribed medication are :
 - Able to access the oral anti-virals within primary care, promptly, from a choice of locations within Surrey Heartlands geography (at least one per place will be commissioned).
 - Able to access IV treatment within primary care promptly (only 1 pharmacy will be commissioned)
 - Appropriately counselled on their treatment.
 - Provided with advice on self-care of COVID-19 infection.
- To learn from use of the service if there are any issues with local routine routes of supply.

Drugs covered

Each provider will be required to stock (as a minimum) the following items:

Drug	Preparation	Volume
Paxlovid	150mg/100mg tablets	3 original packs (30 tablets)
Molnupiravir	200mg capsules	2 original packs Note continued inclusion of molnupiravir will be reviewed after NICE have completed their appeal process

In addition to the above one of the providers will also be commissioned for IV treatment and will be required to also stock the following items:

Drug	Preparation	Volume
Sotrovimab	500 mg/8 mL (62.5 mg/mL) single-dose vial	10 (1 single dose vial)

Note: sotrovimab is a fridge line: the provider commissioned for IV treatment must be able to maintain the cold chain throughout service provision

3.3 Population covered (inclusion and exclusion) criteria

Six community pharmacies will provide the oral anti-viral service based on location and opening hours. One of these community pharmacies will also be commissioned to provide an IV and on-call service. An expression of interest form is available at appendix 1 to apply for service provision. Appointed sites are listed in appendix 2.

Inclusion:

- Adults as per NICE guidance, BNF and SpC.
- Patients can only be accepted into the service on presentation of a valid FP10 prescription (or via EPS – Electronic Prescription service) for the oral anti-viral medication issued by the COVID medicines delivery unit.
- In line with the SPC treatment should be commenced within 5 days of symptom onset. Treatment commencement may be extended up to a maximum of 7 days from symptom onset if clinically indicated (treatment commencement beyond 5 days from symptom onset is off-label).

3.4 Service description/care pathway

The service requires the pharmacy to:

- Fill prescriptions presented for the oral anti-viral medication for urgent treatment of COVID-19 following prescription by the COVID medicines delivery unit.
- Fill any prescription presented for the oral anti-viral medication presented for urgent treatment of COVID-19 when referred by a pharmacy that cannot supply without significant delay following prescription by the COVID medicines delivery unit.

- For the IV service (1 community pharmacy): dispense against a Patient Specific Direction (PSD) IV medication for urgent treatment of COVID-19 following prescription by the COVID medicines delivery unit (Appendix 7).
- Have undergone training in relation to the use of Paxlovid / Molnupiravir (and sotrivimab if providing the IV service) for the treatment of COVID-19.
- Advise patients or carers about:
 - preventing the spread of infection.
 - seeking medical help if symptoms worsen rapidly or significantly at any time.
- Patients are encouraged to send a representative to collect the medication from the pharmacy.
- Patients are requested not to attend in person as they have recently tested positive for COVID-19. If a patient is unable to send a representative, they can attend in person, however they must not enter the pharmacy. A member of the pharmacy team should take the medication outside to give the medication to the patient, for example in their car.
- Where a patient is unable to send a representative to collect the medication/ attend in person as per point 6, arrange a same day delivery. Any requests received within 3 hours of the pharmacy closing for that day can be delivered the following morning, and as early as possible.
- Ensure the patient/ patient's representative understands the instructions and is counselled in line with the Summary of Product Characteristics for the medication. Where by a delivery service is arranged (above bullet point) the patient / patient's representative will need to be appropriately counselled via the telephone.
- Ensure the patient's representative can advise the patient how to take the medication. The route of administration is oral.
- For the IV service (1 community pharmacy): advise the patient / patient's representative that you will be notifying the community service provider (providing details including name/ address / telephone number) so that they can arrange an appointment time to come and administer the IV treatment at the patient's home (Appendix 6)
- UK residents who are eligible to receive COVID-19 medicines in England will have to pay a prescription charge for COVID-19 medicines prescribed in primary care.
- For clinical queries, pharmacist to contact the prescriber as detailed on the prescription.
- If a prescription is not collected within 24 hours to notify the prescriber as detailed on the prescription.
- Complete and return a quarterly data collection form to monitor service use and identify issues with routine supply routes in Surrey Heartlands (appendix 3).

To provide the service, the pharmacy must be able to meet the following requirements:

- The pharmacy holds the specified oral anti-viral medicines, required to deliver this service, in stock and will dispense (and re-order) these in response to an NHS prescription presented.
- For the IV service (1 community pharmacy): the pharmacy holds the specified IV medicines, required to deliver this service, in stock and will dispense against a PSD and re-orders further supply using a signed order from Frimley Park Hospital **(add details – service provision not till 1st April 2024)** **note:** this is DHSC stock available FOC that cannot be obtained via wholesalers.
- The pharmacy must keep a minimum stock level of the drugs described in section 3.2. Full packs as described in section 3.2 must be kept in stock.
- If the pharmacy is not able to dispense the prescription for oral medication when presented, then they need to find another community pharmacy that is able to fill the prescription. This should be done by telephoning another community pharmacy to ensure they have the medication in stock, it should not be assumed that because a community pharmacy is on the service list they can supply on every occasion.

- For the IV service (1 community pharmacy): if the pharmacy is not able to dispense the IV medication against a PSD then they should notify the prescriber at the COVID Medicines Delivery Unit and notify the Medicines Optimisation Team at Surrey Heartlands ICB syheartlandsicb.mo-admin@nhs.net
- In the event of supply issues or long-term availability problems, the pharmacy will inform the Medicines Optimisation Team at Surrey Heartlands ICB by email enabling the issue to be cascaded to relevant parties: NHS Surrey Heartlands: syheartlandsicb.mo-admin@nhs.net
- The pharmacy contractor has a duty to ensure that pharmacists and staff involved in the provision of the service have relevant knowledge and are appropriately trained in the delivery of the service.
- The pharmacy will have and maintain a Standard Operating Procedure to meet all these service requirements and reflect changes in practice or guidelines.
- The pharmacy must demonstrate it has sufficient indemnity cover to support the provision of this service.
- The pharmacy contractor has a duty to ensure that pharmacists and staff involved in the provision of the service are aware of and operate within local protocols. This includes all locum pharmacists.
- The ICB will promote awareness of the service with prescribers and other healthcare professionals including the Acute Trusts.
- The ICB will regularly review the service and drug choice to ensure that it reflects the availability of new medicines and changes in practice or guidelines.
- When drugs held in stock expire - stock should be replenished as soon as possible. Currently the supply has been made available Free of Charge (FOC) due to a large amount of centrally held stock so no claim for expired stock is required. When the FOC stock has been utilised a claim can be made by the pharmacy to the ICB via Claim form (appendix 4) to cover the cost and replacement of these drugs.
- The ICB will disseminate information on the service to other health care professionals in order that they can signpost patients to the service.
- The ICB and Local Pharmaceutical Committee will disseminate information on the service to other pharmacy contractors in order that they can signpost patients to the service.

On-call

- One community pharmacy will be reimbursed to provide on-call cover for Bank Holidays. This will require an on-call contact number to be provided to the East Berkshire Primary Care team who undertake the triage, clinical assessment and if appropriate dispensing for the COVID medicines delivery unit (CMDU) service to enable them to communicate with regards to prescriptions issued.
- The on-call pharmacy will provide cover from 10am-4pm on the Bank Holidays.
- The community pharmacy providing on-call cover will also be the community pharmacy providing the IV service.

3.5 Interdependence with other services/providers

- Details of the pharmacies will be circulated to East Berkshire Primary Care CMDU team, all GP surgeries, Acute Trusts, Out of Hours GP providers and to other Community Pharmacies.

3.6 Monitoring and Audit

- The provider should audit the standards of the service on an annual basis to ensure compliance with the LCS requirements and identify areas for improvement, which the provider would need to address. Complete and return a quarterly data collection form to monitor service use and identify issues with routine supply routes in Surrey Heartlands (appendix 3).
- The provider is required to submit an annual (1st April – 31st March) audit return form (appendix 5) to the ICB's Medicines Optimisation Team (MOT) on an annual basis (by the 30th April of each year).
- The level of service provided will be monitored by such means as required by Surrey Heartlands ICB.

- The provider should obtain feedback on the service from the patients who use it. This feedback should be reviewed by the provider and where appropriate, changes should be made in order to improve the quality of the service. If feedback obtained is related to changes in this LCS, this should be given to the ICB.

4. Training and Competence

The pharmacy contractor has a duty to ensure that pharmacists and staff involved in the provision of the service have relevant knowledge and are appropriately trained in the operation of the service. The pharmacy contractor has a duty to ensure that pharmacists and staff involved in the provision of the service are aware of and operate within local protocols. This includes all locum pharmacists.

5. Applicable Service Standards

5.1 Applicable standards

Applicable standards include but are not limited to:

- Community pharmacy contractual framework [Community Pharmacy Contractual Framework: 2019 to 2024 - GOV.UK \(www.gov.uk\)](#)
- [NICE TA878](#)

5.2 Further information

- British National Formulary (BNF) [BNF \(British National Formulary\) | NICE](#)
- Surrey PAD [Prescribing Advisory Database \(res-systems.net\)](#)
- Summaries of Product Characteristics (SPC) [Home - electronic medicines compendium \(emc\)](#)

6. Pricing and Costs

6.1 Pricing

Surrey Heartlands ICB agree to pay the following:

- Annual retainer of £435 for pharmacies participating in the scheme.
- Payment for stock levels required to initiate the service at Drug Tariff price plus VAT (where applicable – initially available FOC).
- Reimburse the cost of medicines on the list which have expired (when applicable – initially available FOC). The reimbursement will be claimed by invoicing the ICB at the cost in the Drug Tariff (plus VAT) at the time of the claim. Payments will be made within 30 days of the invoice. A template is available at appendix 4.

Note stock is currently free of charge.

- Should, following a review, items be removed from the list then the usual 'out of date' claims process should be followed. The removed items should not be re-ordered and any remaining undispensed stock (after 3 months) should be claimed as 'out of date/no longer in use'. Such changes will be communicated to the providers and timescales outlined.
- Payments for delivery are £11 per delivery for any delivery associated with supply within the pharmacies usual delivery catchment area and delivery times. In mitigating circumstances when it is not possible for the contracted pharmacy to use their usual delivery service within the delivery catchment area the pharmacy can utilise a courier or deliver themselves. Payments for deliveries outside of the pharmacies usual delivery area (or in mitigating circumstances within usual delivery catchment area) will be based on receipts for the delivery charges or at a rate of £0.56 per mile. These should be claimed monthly.
- IV service (one site only agreed with ICB ; same site as providing on-call service):
 - Dispensing fee / notification to community provider: £15 per item supplied by PSD
- On-call service (one site only agreed with ICB):
 - On-call cover for bank holidays: one off payment per year £4,000
 - Call out fee: per call out £50

6.2 Claims

- Each community pharmacy contracted to provide this service will receive payment from the ICB following receipt of the invoice claim form (appendix 4), via NHS Shared Business Services.

The Provider must submit an invoice to SBS via an e-Invoicing platform in accordance with SC 36.49 with the invoice claim form as an attachment to the electronic invoice. E-Invoicing guidance can be found here: <https://www.sbs.nhs.uk/supplier-invoicing>

The invoice claim form

- Must be completed FULLY,
- Must be scanned legibly,
- Must have all sections of the form completed by **typing** and **NOT handwritten** (other than the signature).

Providers transitioning to e-Invoicing may continue to submit invoice claim forms on paper but only with the written permission of the Commissioner.

Invoice claim forms that are submitted on paper:

- Must be completed FULLY,
- Must be legible as they will be scanned by SBS,
- Must not be printed on dark paper or in purple ink as this will spoil the scanning process,
- Must have all sections of the form completed by **typing** and **NOT handwritten** (other than the signature),
- Must NOT have staples as this may create problems when the form is scanned by SBS and
- Must be sent **NHS Surrey Heartlands ICB, QXU Payables M895, Phoenix House, Topcliffe Lane, Wakefield, WF3 1WE.**

Personal identifiable data must not be included with any invoice or any on documentation relating to claims for payment sent to the Commissioner.

7. Termination

The provider may terminate this agreement by giving NHS Surrey Heartlands ICB 3 months' notice in writing of its intention to do so. Such notice, once given, may only be withdrawn with the agreement of NHS Surrey Heartlands ICB who shall not be required to agree.

NHS Surrey Heartlands ICB may terminate this agreement:

- By giving 3 months' notice of termination in writing. Such notice, once given, may only be withdrawn with the agreement of the provider who shall not be required to agree.
- By giving any period of notice it considers appropriate, including none, if it considers this to be necessary in the interests of patient safety.
- If it is brought to the ICB's attention that a provider has breached the requirements as set out in this service specification, then the provider may be asked to withdraw from providing the service.

8. Location of Provider Premises

The Surrey PAD (<https://surreyccg.res-systems.net/PAD/>) contains the list of providers who are commissioned to provide this service. Search Covid-19 oral anti-viral medication.
