

## Deadline Tracker April 2025

If you are part of a pharmacy group or multiple, please liaise with your area managers/head office.

Subject	Requirement	Deadline	Action and links	Tick when completed
Pharmacy First	Pharmacy Income	From 1 <sup>st</sup> March 2025	The activity threshold of clinical pathway consultations increases to a <b>minimum of 30 clinical pathways per month</b> . This means pharmacy owners have to provide a <b>minimum of 30 consultations that pass the gateway point</b> (as detailed in the clinical pathways) from March 2025 to end of May 2025 to be eligible for the £1,000 monthly payment.	
NMS Claim Change on MYS	Pharmacy Income	From 1 <sup>st</sup> April 2025	<p>The payment structure for NMS will be simplified to a £14 fee for each Intervention or Follow up consultation provided to the patient, i.e. a total fee of £28 will be paid if the pharmacy has done both the Intervention and Follow up consultations. This change removes the current, complex fee structure, so it is clear what pharmacy owners will be paid for providing the service and it also recognises the difficulty in reaching some patients for Follow up consultations.</p> <p>Later in 2025, the NHSBSA will amend the MYS module which pharmacy owners use to claim for their provision of NMS to allow the number of Intervention consultations and Follow up consultations to be separately entered. For claims for NMS provided in <b>April and subsequent months, up until that change is made to MYS</b>, pharmacy owners will need to claim the total number of Intervention consultations and Follow up consultations they have provided in the month. For example:            Number of completed Intervention consultations – 20            Number of completed Follow up consultations – 11            Number of NMS provisions to be claimed in the MYS module – 31.</p> <p>Once the NHSBSA have updated the MYS module, pharmacy owners will be able to separately report on the number of Intervention consultation and Follow up consultations, with the NHSBSA making payment based on the total number of each.</p>
