| | 1) Community 2) Hospital | | | | | |
| | 3) General Practice | | | | | |
| | 4) Children 5) Pregnancy | | | | | |
| | 6) Care Home | | | | | |
| | Sepsis - assessment | Access the assessment | ✓ | ✓ | | |

^{*} An electronic certificate of completion of the training is provided following the completion of the training and e-assessments. Pharmacy owners must keep a copy of the personalised certificate for each member of staff as evidence that the training and e-assessment has been completed. This evidence must be retained for three years for post-payment verification purposes. Please ensure you have the CPPE viewer turn on.

Since there is no e-assessment for the CPPE Consulting with people with mental health problems, pharmacists will need to confirm completion of the e-learning in their CPPE record. When a pharmacist has confirmed completion, they will be able to download a certificate of study. Pharmacists will need to locate the CPPE Consulting with people with mental health problems e-learning programme, select 'Certificate of Study' and confirm they have completed the e-learning programme to download the certificate.'
